

# Microtec SHP-20LP4M

## MaxArmour Auto Open Clamshell Heat Press

### OPIS

The world's Most Energy-Efficient Press! Special Fashion Design "loudspeaker". State-of-the-art design with built-in fan for heat releasing. Die-casting heat platen technology largely shortened the heating time from start-up temperature to the operated temperature. Save your time and save electricity. Teflon coated heat platen. Laser quality steel framework, smooth shock opening. Perfect for applying all types of transfers including inkjet plastisol, foils, sublimation, create custom T-shirts, mouse pads, license plates & more.

The Max Armour Manual Heat press is better than the normal high pressure heat press machine is for its attractive design, consistent quality, speedy temperature rising, lightweight constructure. The heating time would be only 9 minutes from 0 to 180 degrees. The built-in Fan design which could prolong the life time of the machine. In the meantime, the updated digital control with Bright Backlit Display which bring you excellent performance. It is suitable for both home and business use.

### SPECIFIKACIJA

Model No.	SHP-20LP4
Type:	Heat transfer
Plate Type:	Flatbed Printer
Usage:	Sublimation transfer Individual Printing
Color:	Multicolor
Automatic Grade:	Manual
Platen Size:	16"x20"
Machine Color:	Black
Certification:	CE

### FEATURES

- Bright Backlit Display
- Die-casting Even Heat Platen
- 100% Saving on Heating Time
- Molded Strong ABS Framework
- Built-in Fan for Heat Releasing
- Accurate Digital Temperature & Time Control
